

Lifejackets

Pilot Lifejacket

The Pilot Lifejacket is an integrated Life preserver/Survival vest system which incorporates an inflatable life preserver with a modular survival vest. A mesh vest provides a platform for the integration of the life preserver, equipment pockets, holster, hoisting/lifting bucket and aircrew restraint harness. The Pilot Lifejacket includes equipment pockets specifically designed to carry essential survival accessories such as Radio, HEED, Flare, etc. The equipment pockets and holster are installed via combination of lacing and velcro fasteners permitting easy removal of any accessory.

The flotation system consists of a unique dual chamber flotation cell, providing 52 pound buoyancy, and is yoke style which will ensure that an unconscious aviator will float head up out of the water and will also self-right a survivor after inflation. Inflation is activated with a manual inflation system, utilizing 25 gram CO2 cylinders on each bladder. Backup oral inflation is provided on each cell. The life preserver is also attached via a combination of lacing and Velcro fasteners permitting easy removal.

Mariner Lifejacket

RescYou Mariner lifejacket with optional harness. Elegant two tone design and ultimate comfort with flat collar design for more neck room.

Type: Inflatable working and leisure lifejacket

Buoyancy: 150 Newtons

Weight: 1,15 kg
